## **Continuation Sheet**

#### Continuation of 3. NOTE:

The proposed additional limitations to claim 1 would result in a claim having a scope not previously considered by the examiner. Accordingly, the proposed amendment would necessarily required further consideration and/or search.

### Continuation of item 11. NOTE:

#### Claim 36

Regarding the Miller reference as applied to claim 36, on pages 14-15 of the response, applicant first asserts that Miller does not show "a valve body having a first inlet configured to receive a fuel, a second inlet configured to receive a fluid." Applicant's appears to argue that a fuel has been positively recited in applicant's claims. The examiner does not agree. As noted in the prior Office action, the examiner does not consider the "first inlet configured to reveive a fuel" to be a positive limitation of a fuel. Instead, this limitation has bene regarded as requiring only requiring a first inlet that is capable of receiving a fuel. For the reasons previously noted, the first inlet of Miller is considered to meet this limitation.

Applicant also argues that Miller does not shows a "lever selectively securable to a first portion of the valve body or a second portion of the valve body opposite the first portion." The examiner does not agree. Applicant correctly notes that the lever (64) of Miller is connected to handle (62) such that the lever rotates with the handle when reversed. However, despite the connection between the lever (64) and the handle (62) when these components are reversed (i.e.

Art Unit: 3749

compare Figs. 2 and 3) the lever is regarded as being secured to first and second portions of the valve bodythat opposite one another as recited in applicant's claim.

Applicant does not argue that claim 36 is not properly rejected by the Clinton reference.

Claim 41

Claim 41 has not been applied in the rejections to the claims applied on the basis of the Miller reference. The examiner agrees with applicant that this claim positively recites a "torch" and "combustion tip" within the body of the claim. However, claims 41-43 have been applied in rejections on the basis of the Clinton reference, which shows a torch and combustion tip. The examiner notes that the statement of the grounds of rejection appearing on page 2 of the Office action mailed 6/8/2006 does not reference claims 41-43. However, this is a typographical error, as the limitations of claims 41-43 are clearly addressed in the discussion of the rejection that follows on pages 2-4 of the 6/8/2006 Office action (note particularly pages 3-4).
